

# Dynamic Purchasing System

The solution that will change your recurring contracts and purchases.

# Dynamic Purchasing System

The solution that will change your recurring contracts and purchases.

The Dynamic Purchasing System is a totally electronic procedure through which it is possible to receive applications and admit interested companies to form part of a catalog, which will later be used to invite these companies to present their offers to the contracts published within the system itself.

The purpose of the Dynamic Purchasing System (DPS) is to simplify and streamline public procurement through the use of new technologies, with special emphasis on those contracts of current or recurrent use.

# Benefits

Innovation and competition at their best.

## Equal treatment

Access to the system is not restricted to an initial period. The providers can apply for joining at any time. They can make as many applications as they wish if they do not initially meet the requirements.

## Transparency and traceability

Mandatory publication through electronic channels. As it is a fully electronic procedure, the traceability and auditability of the data is guaranteed throughout the process.

## Simplicity and focus

Providers can submit their application for participation with the required administrative documentation only once, thus avoiding duplication of processes. Companies are free to focus only on the presentation of their commercial proposals.

## Customization

Providers participate only in those categories that interest them. They can update their subscription to the System during the whole duration of it.

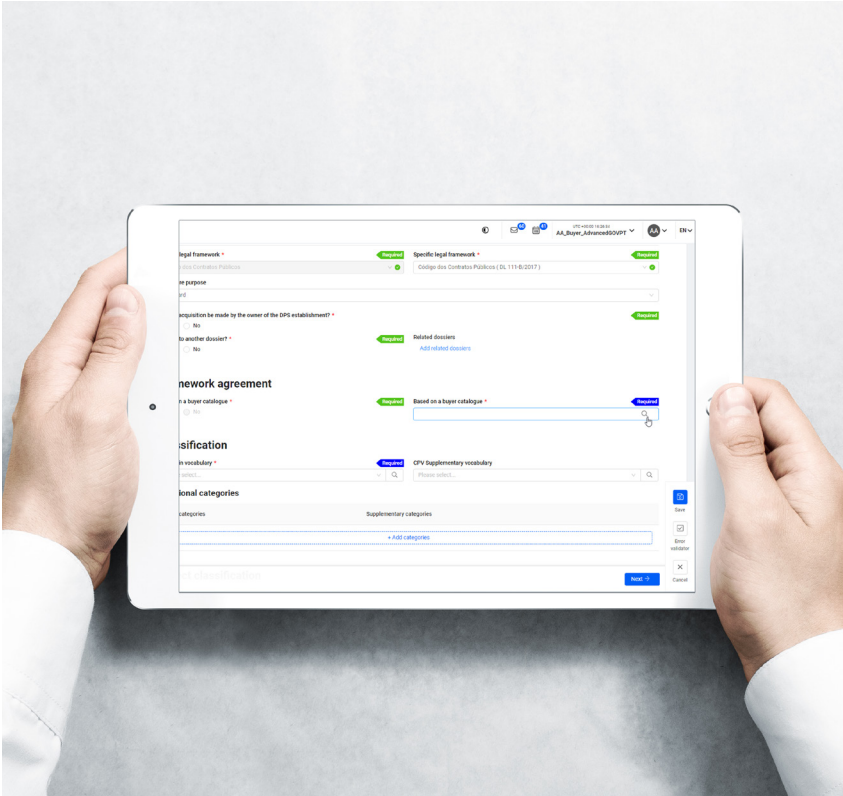

## Agility

Each invitation to a tender generates an automatic alert to the suppliers. A tender can be awarded within 10 days, which is sufficient to refine the contract.

## Limitless

There are no limits to the number of awards per contract or per year.

# How does it work

The system runs in two phases.

## PHASE 1

### CREATION

Company registration

Companies can apply for membership during the entire duration of the DPS.

The contracting authority will evaluate the requests for participation within ten working days.

30 DAYS

BEGINNING OF THE DPS

Suppliers admitted at the time of tendering receive an invitation to submit their offer within 10 days.

## PHASE 2

### DERIVED PURCHASES

Unlimited proposals from the companies that are part of the catalog for each tender.

Admitted suppliers become part of the catalog automatically.

Rejected applications may be resubmitted at any time.

## DURATION OF THE DPS

Each tender is independent, and there are no limits on the number of awards.

Throughout phase 2, phase 1 remains fully active and open to new companies.

# Some of our clients

Customers all over the world are using our Dynamic Purchasing System.
